

House system and Clubs

1. The house system is an integral part of our school. It gives a sense of belonging and shows the spirit of competition.
2. The surface of a gem is cut into flat faces known as facets, to make them more valuable. Same way with the help of in-house activities multifaceted individuals.
3. The four houses characterize the four “Gems”, as we compare our children with those precious gems, the most valuable assets of mankind.

Houses are:

1. Topaz – Yellow
2. Ruby – Red
3. Emerald – Green
4. Sapphire – Blue

At the end of the academic year, the house with the highest aggregate scores wins the Inter House Championship trophy. A house once allotted to a student will not be changed.

Clubs in schools are initiative to encourage greater participation by students and to harness the skills and passion of students.

Why Clubs in schools?

To provide a safe, supporting and winning environment for students.

Extra curricular activities are a common part of the school experience. Clubs are often offered based on student’s interest. By understanding the nature and functions of every club, how to start one and what it can try to accomplish, every club can be successful.

1. **Sports and Intramural Club:** Playing sports is one of the best extra curricular activities because it gets you out of your desk. Whether you want to play at a competitive level or just for fun, you'll find a wide range of sports to participate in, like football, track and field, badminton, basketball, chess or carom.
2. **Art Club:** Art club is a creative haven for students who want to explore their artistic side. Art club is a platform given to reveal their inner Warhol, or get involved with sculpture and pottery if you like getting your hands dirty.

3. **Science Club:** Science clubs aren't just for mad scientists. They are for everyone who is interested in participating in science experiments. This club offers children the chance to do science-related activities that extend and enhance the science they experience in the classroom. It also helps to improve, advance and develop scientific education, thinking, research and attitude, cultivating the spirit of enquiry and generating a love of science for its own sake.
4. **Nature Club:** Nature clubs is to include students with varying degrees of interest in the environment and environmental issues. It is a co-curricular activity with a mission. As a co-curricular activity, it offers opportunities to learn, to develop skills, use talents and have fun. As a mission it attempts to get the uninitiated to enjoy and care for nature, it attempts to spread awareness about the environment and undertake activities to nurture and help the environment regenerate. The Nature Club while having strongly committed to conservation believes that the fun element is necessary to have meaningful and sustained contribution by the students to the conservation efforts.
5. **Interact Club:** The purpose of interact club is to provide opportunity to young children to work together in a world fellowship dedicated to service and international understanding.

The goals of interactors are

- ➔ To develop leadership and personal integrity
- ➔ To create awareness of the home and family
- ➔ To reach the poor and needy people
